

# Wall Dosing Units

## Dispenser for a clean workshop

Wall Dosing Units

Whenever you have to dose fluid media simple and exact, our Wall Dosing Units are the first choice. All parts of the units are made of stainless steel, aluminium and Teflon. When using different materials, we recommend using a separate dosing feeder for each type of material in order to avoid time consuming cleansing.

Wolfgangel Wall Dosing Units are prepared for wall installation - they are easily fixed to the wall with two screws only.
